Oxford

27th March, 1913.

Dear Sir:

I shall have a great many illustrations for my lectures. Do you think it would be possible to get the book out in a form somewhat like the sample I send you - Dechlung und Deckler der Zeit-1911. I mean particularly with reference to the illustrations, full page, half page and marginal. I feel we could make it a rather attractive feature and help the sale (which, by the way, should be large and quite justify any extra outlay). Will you ask about an Epedeascope for my lectures. I am bringing the photos and gelatine films which they tell me at the Clarendon Press are better than lantern slides.

Sincerely yours,

Wm. Osler
