Dear Miss Noyes

That is indeed sad news. Your letter and a copy of the Sun paper from Dr. Fitcher came together. He did a good work for the community and was a loyal member of the profession. I always had a warm regard for him and it was a great delight to know that the profession came to appreciate him at his true worth. The Faculty never had a more devoted member, and in dark days he kept the fires burning. We have had a very good summer - a month in Scotland after the Congress, which was a great success. I have some new books for you.

Yours ever

W^m Osler

Miss Nichols spent ten days with us & was fatter when she left.
