(Handwriting)

American Women's War Hospital,
Paignton, South Devon, England.
April 1./15.

Dear Gorgas

Could you get for the staff of the Hospital the report of the American Army Surgeons who were attached to the Russian-Japanese war. They would be of great use in the preparation of their reports. The work here goes very well. Many good cases & all the men are greatly interested. Yesterday a new convoy came in and I was surprised to find 9 cases of perforating wounds of the chest, not one with fever or pneumothorax.

With greetings to my many mutual friends

Sincerely yours

Wm Osler
