

From the Regius Professor of Medicine, Oxford.

(Dr. F. H. Garrison)
(typewritten)

5, April, 1915.

Dear Garrison,

I am delighted with that chapter on Billings, and I predict a great success for the volume. It is a worthy biography of a man who did great work for his day and generation. Miss Acland is not yet back from Madeira. I will send the proofs to her.

Would it be possible to let me have a list of your incunabula, up to and including 1480? In the list I am preparing I would like to put S.G.L. after a good many.

Things here are going well. If we could only shut up the newspapers for six months and close the Ananias and Saphias clubs, things would be much more satisfactory. There is no question that the ~~British~~ 'Tommy' is able to give a pretty good account of himself, and we hope to have a couple of million in the field before July 1st.

Poor Klebs must have had a devil of a time. American must be a cold place for the German sympathisers at present.

Love to Gorgas and any old friends.

Sincerely yours,

Wm Osler.
