

(typewriting)  
FROM THE REGIUS PROFESSOR OF MEDICINE, OXFORD.

(Dr. W. S. Thayer)  
12, April, 1915.

CUS417/119.109

Dear Thayer,

Would it be possible to have copied for Ross Crawford's paper, which is in the Historical Society, and also Nott's original article, on the mosquito malaria? Apparently they have never been reprinted. One day at the Historical Society's rooms Cordell showed me one of Crawford's papers- Ballemore Obsewer 1906-09 - I think the malaria.

Things have been quieter here lately- not so many wounded coming over. I had a very nice week at the American Hospital, Paignton, and saw a great deal of interest.

Revere is at Cleveden and, I think, very happy in his work. He will join Birkett and Campbell Howard and Billy Francis in the McGill unit, which is due here towards the end of the month.

Things are evidently going well. The new armies here are far better than one could have ever expected.

I hope you are quite yourself again.

Love to Sister Susan.

Sincerely yours,

Wm Osler
