

From the Regius Professor of Medicine, Oxford.

18 May, 1915.

Dear Streeter,

Thanks for your list. I am glad to see that you have got that noble volume of Aristotle, 1476, one of the best pieces of typography, I think, in existence.

I have not yet got my bibliographical address on the Early Printed Books ready. I have got the photographs, but they take so much time to go over with the references.

Thanks for the Vesalian item. I would like also the New York reports of the meetings if they have been published separately. Send me your paper on Aristotle. Have you got D'Arcy Thompson's book on Aristotle as a Biologist? If not, I will ask him to send you one. I picked up a superb copy of the edition princeps, which at least gives a tone of respectability to my collection.

We had a very brief but delightful visit from Cushing. Some summer you must join our Bodleian circle and do an Arbeit on some of our MSS. Unfortunately Singer has been called off by the war.

Sincerely yours,
Wm Osler.
