Dear Streeter;

Where is your Aristotle paper? A friend of mine has just edited for Loeb's classics Galens de Nat. Facultatibus, and he wishes in a brief bibliography to put recent articles dealing with Greek Science and Medicine. Your A. paper might come in here - as A. really had the key. Please get a year off and come to our Science-History room at Bodley. The war has upset us badly as 3 of the 5 workers have gone. I am struggling with my incunabula paper but get very little time for work at it. I conduct a correspondance bureau for Doctors and Nurses wishing jobs as they seem to have a notion that I am in charge of all the Hospitals here and in France ! I am working at my library at spare moments- but my man has gone & progress is slow. Love to Harvey C. & best wishes for 1916.

Yours sincerely  
Wm Osler
