

CUS 417/121.35

From Dr. Malloch's Journal.
Sunday, Feb. 6, 1916.

Came to Oxford last night. Cases at the Infirmary. Sir Wm. looks in Klebs for rare pathological conditions. Has secured a fine copy of original (?) ed. of Ambroise Pare's Anatomy, and original ed. of Borelli's "De motu Animalium". We put the bibliographical books into the fine new bookcase in the dining-room between tea and supper.
