

C O P Y

From the Regius Professor of Medicine, Oxford.

May 3, 1916.

Dear Flexner,

Thanks for the Journal which has not yet come to hand. I wish we had known about it earlier, as last summer a number of cases of jaundice⁺ were admitted at Paignton from Egypt. They are working at it out there, I believe, and a certain number of cases have occurred in France. I sent word to Rose Bradford about your work, and also the abstract of the German paper. It is a great find.

The epidemic nephritis is a most interesting disease. So far nothing has been made out about it.

Love to the family.

Sincerely yours,

(Signed) Wm. Osler
