

COS 917/121.151

From the Regius Professor of Medicine,  
Oxford.

To Sir John MacAlister.

June 9, 1916.

Dear MacAlister,

Many thanks for Garrison's letter which I return. He is a good sort, and a worthy successor to Billings and Fletcher.

If the Congressional Library under takes to print cards of all the newly issued Medical books, do you think the English libraries would take copies? The more to join, the cheaper they would be.

Sincerely yours,

Wm. Osler.
