Jan 1917

Dear Kind man to send that nice Xmas cable which we all appreciated very much. I hope you got a little booklet from me - a Galen I think, or was it the Theophrastus - one or other of the Loeb Translations. I have been reading the Theophrastus with the keenest interest. Wonderful how much these old Greeks knew. Have you seen Livingston's Plea for Greek in Education? (MacMillan & Co) - good statement. At the B.M.Lib stir up one of the girls to stir up among the duplicate & odd nos of the Bost.Med & Surg.Jr.& find me the 2nd half (or the whole) year of 1846. I want it badly for my Anaesthesia section. You will have a gem of a plate about the end of Jan. - the best illustration of book-worms ever made. I am sending plate suitable for framing.

Our Science room at Bodley grows - but unfortunately Singer is away.

Yours ever.

[The Socratic God for]
Wm Osler.

Ch. in my
collection letter.
