(Letter Script)

Dear Archie,

Clay has written about the price. He should decide. In America the 2.00 bill is handy to send. We find as a rule that people who want a book are not blocked by an extra shilling. I am sure it will go, tho' these are hard days. In any case whatever the cost, the money has been well expended in what you've got out of it in education. All well. I am struggling with almanacs and Prognosticons. Love to Bill.

Yours,  
W.O.
