Letter from W. O. to Dr. Adami

Script.

13, Norham Gardens,
Oxford.

6. VI. 17.

Dear Adami,

I return papers. So glad the news from Isabel is better. I had a nice visit at the Am. Hosp. Paignton, and then a few days with E. B.'s son Jack who is at Torquay. Sudhoff's researches seem to point very clearly to antisyphilitic regulations before 1495 and he scoffs at the Naples story. Have you seen his papers. Some of the Yard (?) lesions described by Celsus may have been syphilitis.

Yours sincerely,

Wm. Osler.
