From the Regius Professor of Medicine, Oxford.

August 30, 1917.

Dear Hurd,

*Review due you 9
Aug. 24/17*

[Wm H.]

L
Congratulations and thanks for the Welch Bibliography. It was a capital idea to have this done as his writings are so scattered. The book is a great credit to the Press. I am writing a note to Burkett about it. I hope your eyes have improved. Trust you are able to use them a little. We have been delighted with visits from members of several units. The Hopkins men went through without stopping. We hear from Boggs and Cushing that all is well and plenty of work. We are kept anxious of course about Revere as he has been in all these heavy battles since April, Arras, Messine, Bulcourt, and now in the fighting near Ypres. He keeps well. His Major and Capt. were both knocked out and the battery has had a pretty hard time. He hopes to get leave when the fight slackens a bit. He has only had 10 days since last Oct. 1st. T. McCrae is in charge of Medicine at the big ^(at Orpington) Carpenter (Ontario) Hospital and has put things in fine order. Fatcher joins him shortly.

Love to the girls.

Ever yours,

(signed) Wm. Osler.
