13, Norham Gardens,

Oxford.

Dear J.P.

So nice to have happy news of you & yours & of the four Kiddies. How happy you must be with them. My love to them all. Shall be so glad to have your *withering* paper. Balfour was an A 1 clinician.

Re rest. Do you remember how often we saw the good effects in valve cases. I have never used the prolonged rest in Ang. pect. Have you used Therobromine? In the angina of effort it has an extraordinary effect. I have now an interesting series of cases since my note in my angina lectures.

Thayer & Longcope were here last week end.

Love to you all.

Yours

W.O.
