Dear Adami,

Billy Francis has just come - Jack had meningitis. The pneumonia was not severe - no heart disease but had emphysema. I will send a note to the Lancet - but will you write the obituary? Poor fellow! it is a sad business. Tom will be heart-broken as he adored Jack.

So glad Isabel* is doing well - give her my love, and tell her Victoria Ward is very lonely without her. She missed a really good medico-chirurgical clinic from me last Sunday.

Sincerely yours,

Wm. Osler.

J.G.A. * My daughter had been operated upon by Arbuthnot Lane - appendicitis.
