Letter (Script)

4. 4. 18.

So glad Sir John got away.

Dear Archie,

That is very curious I enclosed a letter from W. G. Macallum about the pneumonia epidemic in Texas, following measles. Was the letter censored? I am sure it was enclosed as it is not here. I was much interested in it as he said they had had lesions very similar to those you describe almost identical with the ~~antia~~ ^{antia} ones you showed me. 'Tis too bad. Keep the Cabanes until you have a chance to forward. Cut and read.

Rhea is A.I. I saw him yesterday. No physical signs - or very slight - ~~Truby~~ says. He should go somewhere for 3 months, probably to Pinewood near Reading. All well very busy much bedrilled by many things as usual.

Love to Bill - and the Kaizer should he reach Boulogne..

Finley*

Yours,
W.O.
