

CUS 417/125.127

Dr. William Osler to Dr. J. Collins Warren.

From the Regius Professor of Medicine, Oxford.

14, VI, '18.

Dear Warren,

Do publish the Pulmotor paper. It was an interesting episode, and reminds me of the days at the Phila. Hospital, in '86, when the doctors were pumping Sulph. hydrogen into consumptives per rectum. My paper on the Early Anaesthesia literature and a note on the classification has been sent to the Annals of Medicine. I will ask them to send a proof to the B. M. & S. Journal, as it might be worth reprinting-- parts of it at least, as I have put the Morton case in a nutshell! I shall remain bibliographically unhappy until I get Vol. 35 of the B. M. & S. Jr.

All goes well here. We have Americans every day or so. Jason Mixter spent last week end, Boggs of the Hopkins has just left, ^{Halsey} of N. Y. and ^RCoile of Ann Arbor come today. It is a great pleasure to see these good fellows.

Love to 'Little Johnnie.'

Yours ever,

Wm. Osler.
