Oxford,
22. vi. 18

Dearest Bill,

The Arrhenius will not be over - so Putnam reports - for a couple of weeks. They will send a copy at once. Rhea was here for two days - not a thing to be heard in his lungs. I think you were wise not to accept the Museum berth. You are doing this work well, and the other would not, I feel sure, be so congenial. Would you like me to write to the D.M.S. I am writing to Elder.

Tell Archie I have sent his delightful p.c. with the [M]ars longa to the Lancet.

All well. I told you of the Copernicus - 1543.

Grace had a nice letter from Jim.

Yours ever,

W.
