From the Regius Professor of Medicine,
OXFORD.

23 August 1918

Smun

Dear Flexner:

We shall be so glad to see you. If
landing in Liverpool come to us direct.

Draper will have sent you his Report.

It is unfortunate that more experimental work was
not done. Then the epidemic has subsided. I have
not yet had the paper from Bradford on the epidemic of
Polio-myelo-neuritis, as I expect it will turn out to
be.

Love to you all,
