Letter (Script)

11. 1. 19.

Dear Archie,

Thanks for your paper which is A.I. I see your percentage is about what was found in my first 100 pneumonia p.m.'s at the M. G. H. a little less. I consider what the general mortality has been very high I fear even before this influenza outbreak. Geo. Shattuck and some of the Harvard unit came this eve. I have been very busy in town several days in succession. The Class. Assoc. address is shaping but 'twill not be easy. Very critical audience! My love to Lucian is he not delicious? We hope to have Harvey Cushing over any day now. Norman is still here and rumour says goes to Clevedon. Bill is in fine form. We are trying to clean up the V. D.* question. Adami gave a fine address the other day and Hugh Young gave the A.E.F. experience.

Yours,
W. O.
