

(Sm to you/ Sir Edmund)
To Major Bradshaw.

Jan. 31. CUS417/127.46

V.D.

Campaign.

I have forgotten exactly what I said but I daresay it is all right. The word 'disinfection' is perhaps better than prophylaxis. We had a great conference yesterday at ~~some~~ ^{the} National Council of Public Morals at which they badgered me for two hours. We ~~could~~ ^{can} never do anything until it is made a **Public Health matter**. . . .

Do you not think we should have a meeting this Summer of the Assoc. of British Physicians? We shall forget what we all look like! **Your myelopathic albumosuria** would do for a report. Sorry the Quarterly Journal is so late, but we have a double number with a fine article by Bradford.
