

From Dr. Malloch's Journal.

Friday, Feb. 7, 1919.

Worked practically all day doing up the reprints in bundles - he is so glad we are clearing everything up. Going to Bodley in the motor at noon he told me how pleased he was that he had settled about Revere's books. He is going to get a good catalogue of them. Said he could not tell how long he would live "at 70 a man has packed his portmanteau".

After dinner W.O. got out a lot of old papers; letter to Dr. Howard accepting appointment as Prof. of Institutes of Med. at McGill. Old examination papers - physiology - medicine etc. and papers set at Trinity (Canada). Also got out the multitude of diplomas from McGill, "The College" etc. to have them all bound together.
