

March 18.

CUS 917/127.181

Dr. L. F. Barker, Baltimore.

So sorry to hear that you have been ill, and with one of those rapid streptococcus infections. We have had a deuce of a time here, and the young have died in extraordinary numbers. It's a very different outbreak from the one in '89-90, and there's a difficulty often in finding the Pfeiffer bacillus. I hope J.H. is thriving... I keep busy and the men coming in every day or two on their way home.
