Gordon E. H. Brown

Dear Streeter,

I was greatly disappointed not to have you over here - I had hoped to tap all your ventricles. A year from next summer we shall hope to have a 4 or 5 weeks' Summer School for students of the history of Science. I Hope you will be able to come over and give the men 2 or 3 of your interesting "Talks". By that time the Singers will have things in pretty good shape here, and Withington (who has Greek Medicine at his finger tips) will help. I will give the Guainerius item to Gordon Duff, who will be interested.

Sincerely yours,
Wm. Osler.
