

From the Regius Professor of Medicine, Oxford,

13, Norham Gardens.

7th April, 1919

*Ward*  
Dear Dr. Abbott,

I am glad to have your nice letter of the 25th to-day. I will talk with Adami and Martin, both of whom are very sympathetic. I do not know whether Adami is going back soon, but I suppose they all should return before October.

A strong Museum Committee should leave your hands perfectly free. I hope you are better.

I am so glad to hear of the Centenary of the M.G.H. - the occasion should be made much of. Who is to be the Editor?

Billy Francis is very well; he hopes to be sent back to London to help Adami. We are all so delighted at having Geddes as Principal - you will find him very sympathetic, I am sure, with the Museum work.

Sincerely yours,

W<sup>m</sup> Osler
