

Ap. 11. CUS417/128.19

To President James, Univ. of Illinois.

So nice to hear from you and to know that your library thrives: I will bear it in mind and send some reprints and occasional duplicates. I am collecting a library myself on interesting lines, about which I should like to talk to you some day. If any of your men interested in the library are over here in England, I would like a call from them. I get your biological studies which are always of great interest.

Library.
