

(Letter to Dr. Richard P. Strong)
(typewritten)

June 13, 1919.

13, NORHAM GARDENS,
OXFORD.

Dear Strong,

What an angel to send such a fine group of Pasteur papers! Simply splendid! and several of those early chemical ones are among the most important he ever wrote. I am delighted with them - they will make my Pasteur list first-class. I hope you will be able to bring Mrs. Strong to visit us before you leave for America.

We keep busy as usual - a great many American students at present here.

Ever yours,

WM OSLER
