Dearest Sue

How pathetic about the death of that nice girl - Poor thing & typhoid too - so unnecessary! We still keep wishing for you - such days! It is putting Sister in fine form. Such a color on us both. It is really a delightful place. Perhaps next summer you will be able to spare a few weeks from Curzon St & join us with Otilie & the darlings. We must have them over. It was nice to have a first hand account of my darling. I am sure the rest of her life will be according to this beginning. We expect Billy Thayer next week & Archie who will stay with his Auntie at St Aubin We are enchanted with the History of Am- Literature. I am sure John & the boys would like it. I have just finished reading on Benj Franklin to Grace.

The water & the air are divine - the latter nearly as good as Carfax. You will be surprised to hear that the Text-book revision is booming Should you decide to return with Anna & Tony - say nothing about it but just blow in as a surprise! Should you go to Mt Kisco to see Jay call up Mabel & arrange a visit The photographs of her darlings - new ones - are splendid. Stout twice a day! And the Lobsters - to say nothing of 10 piglets & 7 puppies to play with & 28000 Tomato plants within sight!

Yours

W.O.
