

San Francisco June 1st 1876.

Ernest Ingersoll Esq.

Dear Sir - I have read your
Article in the Science Monthly for
May, with interest. I wrote to Prof. Baird
for information as to obtaining dup-
licate sets of the Shells of the region
which you explored, but he simply re-
ferred me to You. I wish to ask if you
can furnish me with good specimens
of the shells of that locality for my
own cabinet. I have most of those on
this side of the Sierras, & should be pleased
to have those if possible. I should like
Jonitæ - Vallonia - the Pupæ - that minute
Microphysa - & H. plexata especially - And
as many other forms as you can furnish.
Dr. Cooper who collected the Northern forms
in Sierras has furnished me some of them.
He is living here tho' I seldom see him.
Hoping to hear from you I remain Yours truly
(over) H. S. Carlton.

Please Address H. P. Bartlett
