

Charles Aston Key 1793-1849
Surgeon

My dear Sir

This disease of
the ventricle requires
absolute rest in the
recumbent posture.
The prolapsus of the
rectum probably arising
from irritation of the
bowel, ~~which~~ may be
relieved by some mild

Mercurine purgation
Hudly purged at night
In the day time I
w^d. give her some gum
and soda to improve
her strength & appetite -
her food I should think
must have been not

good.

Yours very truly

C. A. M. Key

1839.
