

Tetrao

206 -

141. - Tetrao -
male & female -

Men. I have never seen some of these birds
where the spots were on the shoulders only & quite oval
whereas this bird had a ^{white} line down the middle of the feather reaching
to the spot - These birds also had more stripes - one had two on one
leg & three on the other -

Tetrao - (male) female presented
by the Rev. Mr. Vaughan Aug 24th 1866 -
